## Let's take a quick tour...

We offer the latest technology GPS tracking software, having the greatest number of powerful features for both web and mobile app. No matter, how you decide to use our software: whether it would be adapted to track individuals or company vehicles, we promise to transfer your tracking objects, setup software and undertake 24/7 support.

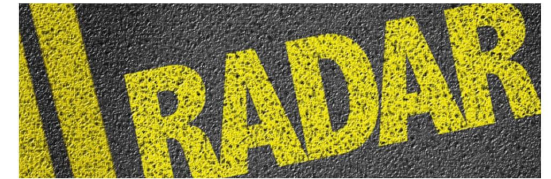

### WEB & MOBILE APP

With a just single click, you can evaluate the driver's and car driving details from the web and the mobile application as well.

### SHARE WITH FRIENDS

Share your journey details with estimated time and the path chosen by you

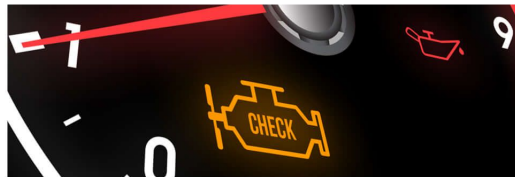

### SPEED ALERTS

Whenever any of your vehicle crosses the set speed limit, you will get notified through instant speed alert.

### GROUP MONITORING

Share your tracks of several users monitoring the same module through the web portal or smartphone app.

### ENGINE ON/OFF

You can turn off the car's engine. So, the car can be safely parked in home's driveway or the garage and be in the user's observation.

### PARKING ALERTS

Whenever your vehicle is being parked, you will receive a notification on your mobile app and web application as well.

**EVEN IN THE MOST REMOTE AREAS WITH UNSTABLE NETWORK, YOU WILL BE COVERED**

## REALTIME LOCATION

Track and locate your fleet in real time without any trouble. Our system not only show the location but also share you the route it is on.

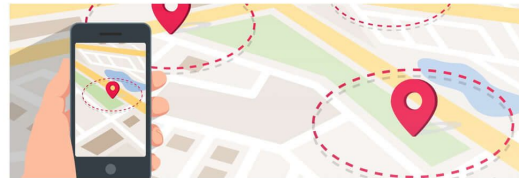

## SMS GATEWAY

Instantly get an SMS to your smartphone about important events, such as vehicle speeding, theft, SOS, engine on/off and much more.

## REPORTING & HISTORY

All important reports and history of your tracking vehicles, group vehicles and people can now be acquired.

## GEO FENCING

The Geofence feature allows you to set up geographic boundaries around areas that have specific interest for you. Receive automated alerts when the object enters or leaves marked.

## PLUG & PLAY

Reliable framework - can be easily plugged onto the vehicle and get things going. You don't have to be a specialist.

## PEACE OF MIND

All tracking information is available only to you: we value your privacy and security. From visual monitoring of your vehicle to safekeeping your trip history - Maark does it all.

fastest growing **software engineering** service providers with **international operations**
